

Anti-copy QR code[®] makes self-service Merchandise pickup more secure and safer

Only the authorized consumer with DENSO's unique Anti-copy QR code can open the locker to retrieve the ordered item.

- Achieve a secure transfer of merchandise to the rightful owner, preventing an unauthorized pick up.
- The cost is lower than NFC, etc.

The Anti-copy QR code can be used to help manage special event entry and identification.

It is suitable for access control into locked facilities or automated stores.

DENSO also offer the QM30, an ultra-small body scanner, perfect for embedding onto compact terminals.
