

IO-Link Gateway for IP67 compliant environments

Balluff has assembled a wide array of gateways like ORiN to connect IO-Link to almost all industrial networks in the market. Their sturdy cases and M12 connectors curtail setup workload and cost. And the built-in self diagnosis function reduces equipment downtime.

Features

- Reduced downtime
 - All channels integrated built-in short-circuit protection circuits.
 - High luminance LEDs indicate faults.
 - Built-in LEDs indicate network and power supply status.
 - Notify fault channel to higher-level controllers.
- Reduce installation workload and cost
 - Connectors vastly reduce workload and wiring mistakes.
 - Sturdy IP67 compliant zinc die cast housing eliminates need for cover.
 - Ambient operating temperature of -5 to 70° C.
 - Off-board device enables control board downsizing.
- Handles a variety of signals
 - Input/output/IO-Link can be set individually for all channels.
 - Max. 2A high power output.
 - Supports configuration files for each network.
