Features

● High-speed/High-precision positioning tools
Supports PatMax RedLine technology
Highly robust with many actual achievements in
minimizing precision variability in robot posi-
tioning applications.

● EasyBuilder interface for easy development
Customizable spreadsheet mode.
Can be freely customized to simplify tasks even
for large quantities of complex jobs.

● Supports all vision tools
Overcomes challenges faced with various image
applications such as pattern matching, image
filtering, flaw detection, optical character recog-
nition and 1D/2D barcode reading.
